City of Wharton Flood Debris Collection

Wharton, TX, October 18, 2017 –

The contractor for flood debris collection will continue to service the City of Wharton until November 13th. To ensure proper and timely collection, please see that all flood debris is kept separate from any other garbage. The collection service will not be able to pick up household garbage and WCA will not be able to collect any mixed trash piles. It is important to place all flood debris at the curb before the cut off deadline of Monday, November 13th at 7 a.m. Any flood debris placed for pickup after the cut off will be charged as a pay pile. The City of Wharton understands not all flooded residents have been able to clean out all debris from their homes but wants to encourage placing all flood debris at the curb before the November 13th deadline as to not be charged. We apologize for any inconvenience this may have caused you due to this flooding event, please call the City of Wharton at 979-532-2491 for any questions.
